

Seed Pack Project

A fun family project about growing happy, healthy children!

Due March 6

Child prints their name

Glue photo of your child in the circle (or I will provide one)

Grown-up writes "planting directions," written especially about your child.

Here are some ideas:

feed spaghetti once a week

apply sunblock

hug whenever possible

Cut on the solid lines, fold on the dotted lines and glue where it indicates.

Make sure the photo and "planting directions" are on the outside.

This will be used for a hallway display, then returned.

*** Please do not put real seeds in the packet.**
